

bicellular tight junction

myelin assembly

MPP7-DLG1-LIN7 complex

protein binding

lateral loop

protein localization to adherens junction

Schmidt-Lanterman incisure

signaling adaptor activity

protein-containing complex

protein localization to myelin sheath abaxonal region

myelin sheath adaxonal region

cell-cell adherens junction

endoplasmic reticulum-Golgi intermediate compartment

protein domain specific binding

establishment of epithelial cell polarity

dendrite membrane

morphogenesis of an epithelial sheet

excitatory postsynaptic potential

positive regulation of protein complex assembly
