oxidation-reduction process

cellular response to reactive oxygen species positive regulation of catalytic activity

superoxide anion generation

superoxide-generating NADPH oxidase activator activity

## NADPH oxidase complex

positive regulation of epidermal growth factor-activated receptor activity electron transport chain

respiratory burst

regulation of respiratory burst

superoxide-generating NADPH oxidase activity

phosphatidylinositol binding

extracellular matrix disassembly

S po  $\sigma$ 

activity

to membran met protein targeting Φ O uperoxi
